Letter of Support for Anna Skotny

To Whom It May Concern,

I am pleased to offer my highest recommendation for Anna Skotny, whose exceptional skills in clinical research and project management have distinguished her as a leader in the field.

I had the opportunity to work with Anna on various projects, including the non-commercial clinical trial CARMEN, which focused on the production of advanced therapy medicinal products (ATMP) - CAR-T. Since 2021, she has served as the Clinical Manager for this project, where her expertise and leadership were instrumental to its success. She demonstrated an outstanding ability to navigate complex regulatory frameworks, address logistical challenges, and coordinate multidisciplinary teams.

Anna's resilience, strategic thinking, and deep understanding of clinical trial design consistently turned challenging situations into success stories. She excels in overcoming obstacles such as tight deadlines, limited resources, and regulatory hurdles, delivering extraordinary results where others might struggle.

Anna's exceptional adaptability, technical expertise, and dedication to excellence make her an invaluable asset to any team. I have no hesitation in recommending her for roles requiring clinical research expertise, project management, and strong leadership skills.

Please feel free to contact me for further details about Anna's qualifications and contributions.

Sincerely,

LEKARZ KIERUJĄCY-KIEROWNIK KLINIKI
